

You Won't Find a 21st Century Job Using 19th Century Methods

Effective job searching is much more than pulling out the Sunday classifieds and calling for interviews. Today many of the top companies don't even run newspaper ads. They often don't use online posting services like Monster or Career Builder. We will teach you how to locate the jobs you want using advanced data mining techniques.

The standard chronological resume that you copy a hundred times and give out in every interview will not get you that job you really want. We will teach you how to write a resume that will market your personal brand in the marketplace.

Interviewing is much more than a conversation or recounting your job history. We will prepare you for tough behavioral interviewing questions and help you understand how to present the challenging portions of your resume in the best light.

The job search is a marketing campaign where you and your abilities are the product. We will help you understand your personal brand so that you are better prepared to search for the job that fits you. We will also help you understand how to present that brand in every aspect of your presentation from your dress to your resume to your interview style.

We are offering special 4 hour sessions to teach our method of effective job search. We are offering morning and afternoon sessions in each location for an introductory price of \$35.00 for pre-registration or \$45 at the door. The morning sessions will run from 8:00 until noon and the afternoon sessions run from 1:00 until 5:00 p.m.

Location	Date
Fort Worth Texas Christian University	January 23, 2010
Austin University of Texas	February 13, 2010
